

English in Use (throughout the MA programme)

The course aims to help learners improve their language skills and become more accurate and fluent users of English. The course is taught interactively and combines pragmatic and sociocultural aspects with the development of language competence. It encourages learners to take interest in the specific areas of their study programme (the social/cultural/political milieu of English-speaking countries).

The coursebook materials are supported by 1) authentic texts taken from newspapers, fiction and non-fiction books 2) authentic broadcasts and interviews 3) teacher-designed materials and tests.
